B.	B. Functional Testing				Results				
Step 1: TES System Design Verification									
a.	In the TES System Design Verification part, the installing contractor shall certify the following information, which verifies proper installation of the TES System consistent with system design expectations:				Y	/ N			
		The TES system is one of the above eligible systems		Initial discharge rate of the storage tanks (tons)		Discharge test time (hrs).			
		Initial charge rate of the storage tanks (tons)		Final discharge rate of the storage tank (tons)		Tank storage capacity after charge (ton-hrs)			
		Final charge rate of the storage tank (tons)		Charge test time (hrs)		Tank storage capacity after discha-	harge (ton-hrs)		
		Tank standby storage losses (UA)		Initial chiller efficiency (kW/ton) during charging		Final chiller efficiency (kW/ton) d charging	on) during
